

Quamvis³²⁰

32 inch 1.3 ATA
PVHO Compliant

Hyperbaric Oxygen Chamber

Quamvis³²⁰

Our newest additions to the OxyHealth line. These PVHO compliant chambers are the most secure, portable, soft-walled chambers on the market. Tested to over 30 psi., designed to be tough for situations that demand the added reinforcement, these chambers are intentionally over-build to be rugged, yet practical and comfortable with a choice of either a 27" or 32" diameter roomy interior. As the name "Quamvis" implies, this mighty chamber is all about giving the most flexibility for a variety of pressure protocols all in a portable design.

Features

- Meets stringent performance specifications of PVHO-1 case codes.
- Compliant to PVHO-1 non-mandatory appendix
- 4 psi portable mild hyperbaric chamber
- Pressure-tested beyond 30 psi to exceed PVHO-1 safety requirements
- Extreme performance reinforcing ballistic nylon jacket with Lexan® mix viewing windows
- External "SafeSet" buckling system for additional secure enclosure support
- Medical pass-through—facilitates external device hookup
- Patent Pending

Accessories

Custom mattress-contoured to fit inside the chamber

Rigid and attractive steel frame maintains form when deflated

Extreme performance reinforcing ballistic nylon jacket with Lexan® mix viewing windows

Peripheral Equipment

Clean air compressor system—double-head, oil-less, dual intake filters

High efficiency in-line filtration system—filters to 0.01 microns

10ft. medical grade hose with quick-disconnect couplings

Analog pressure gauge
