

Quamvis<sup>LITE</sup> 320

32 inch | 1.3 ATA

Hyperbaric Oxygen Chamber

# Quamvis LITE 320

This newest, ultra patient-minded portable hyperbaric chamber was designed and manufactured based on plenty of research and our specialty—input from our existing client base. This critical feedback from concerned parents and medical professionals inspired us to develop the Quamvis Lite with extra emphasis on increased safety and comfort.

The Quamvis Lite chamber is designed to be tough and durable for patients' homes and clinical settings alike. Built with an external frame, this chamber is the only 100% internal obstruction-free, portable mild hyperbaric chamber on the market. In addition, our exclusive "Leak-before-failure" design (patent pending) guarantees that the chamber can never be over-pressurized. The Lexan® mix window reinforcement pane provides additional support across the viewing area. With the flexibility to be upgraded to the Quamvis 320, the Quamvis Lite has been a much anticipated addition to our safety and value-minded chamber line.

## Features

- 4 psi portable mild hyperbaric chamber
- 44 oz urethane bladder with proprietary "SteelWeld" seams
- Lexan® mix viewing windows
- Designed for improved airflow throughout chamber
- Rigid external frame maintains form when deflated
- Obstruction free interior—safe for children
- Medical pass-through—facilitates external device hookup
- Proprietary "Leak-before-failure" design (patent pending)
- Clean-air compressor—double head, oil-less, dual intake filters
- High efficiency in-line filtration system—filters to 0.01 microns
- Ability to be upgraded to the Quamvis 320 and meet PVHO performance specifications

Portable chambers are manufactured in the USA in accordance with FDA, ASME, PVHO, NFPA, and GMP regulations and codes.

## Accessories

Rigid and attractive steel frame maintains form when deflated

Extreme performance reinforcing ballistic nylon jacket with Lexan® mix viewing windows

Custom mattress-contoured to fit inside the chamber

Mattress optional

## Peripheral Equipment

Clean air compressor system—double-head, oil-less, dual-intake filters

High efficiency in-line filtration system—filters to 0.01 microns

10ft. medical grade hose

Analog pressure gauge
